

LAB-1 :PROBLEM STATEMENT 14

Healthcare & Telemedicine Corporate Mental Wellness & Counseling Platform

NAME:BATCHU HARI NAINIKA

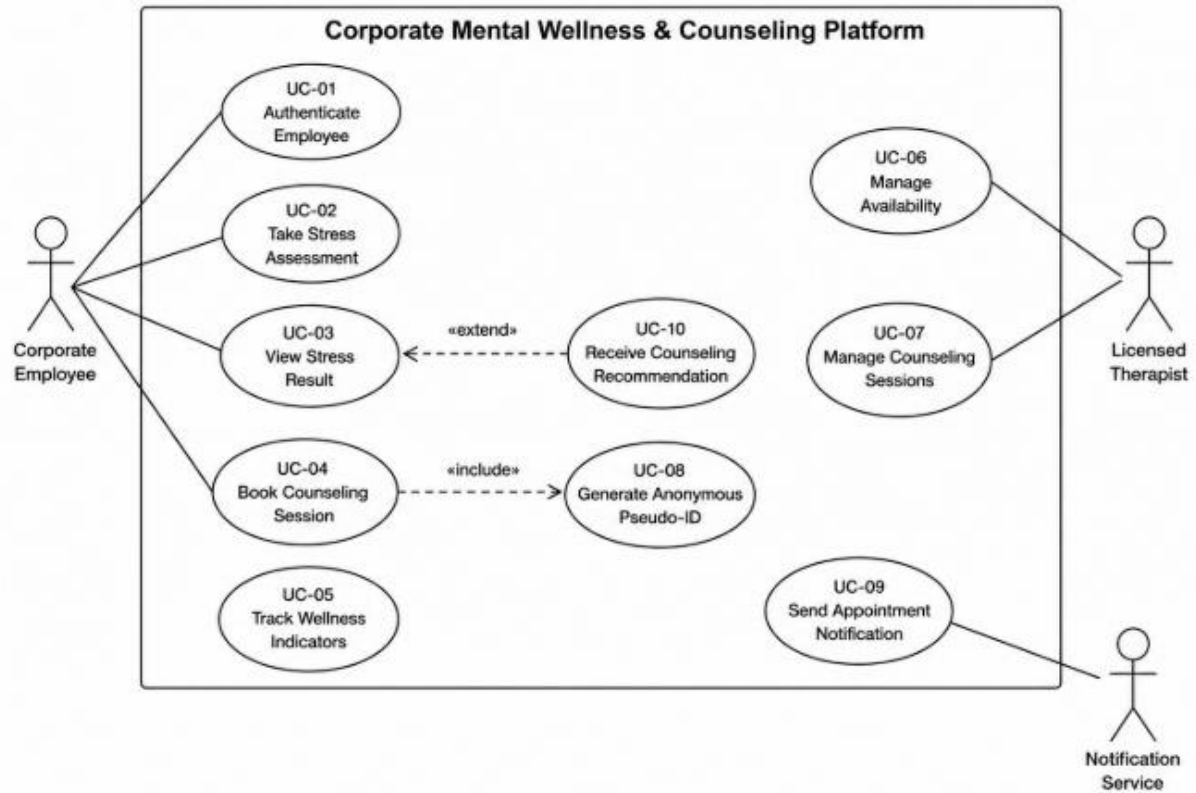

SRN:PES1UG24AM461

1)Requirements Table

Req ID	Type	Description	Priority	Acceptance Criteria	Rationale
FR-001	Functional	The system shall generate an anonymized pseudo-ID for employee accounts so that employees can book counseling sessions without revealing their corporate email or employee ID to the therapist.	High	Pass: Therapist dashboard displays only the employee pseudo-ID. Fail: Employee corporate email or employee ID is displayed.	Protects employee identity and maintains confidentiality.
FR-002	Functional	The system shall allow employees to complete a stress assessment and receive a stress-level result.	High	Pass: Employee submits the assessment and receives a stress-level result. Fail: Assessment cannot be submitted or no result is generated.	Helps employees assess their current stress level.
FR-003	Functional	The system shall allow employees to view available therapist appointment slots and book a counseling session using their pseudo-ID.	High	Pass: Employee selects an available slot and receives a booking confirmation. Fail: The system permits double-booking or exposes employee identity to the therapist.	Provides confidential access to counseling.
FR-004	Functional	The system shall allow licensed therapists to view and manage their scheduled counseling sessions using employee pseudo-IDs.	High	Pass: Therapist can view scheduled sessions and employee pseudo-IDs without accessing employee PII. Fail: Employee corporate email or employee ID is displayed.	Allows therapists to manage appointments while preserving anonymity.

FR-005	Functional	The system shall allow employees to record and view their personal wellness indicators over time.	Medium	Pass: Employee can save and retrieve wellness indicators. Fail: Wellness records cannot be saved or retrieved.	Allows employees to monitor their personal wellness progress.
NFR-001	Nonfunctional	The system shall accurately handle timezone conversions for counseling appointments across different office locations and maintain secure appointment information under peak load.	High	Pass: Appointment times are displayed correctly for the relevant timezones and simulated peak-load testing meets the defined performance target without unauthorized data exposure. Fail: Incorrect appointment times or unauthorized exposure occurs.	Employees and therapists may be located in different timezones, while appointment information must remain secure.
NFR-002	Nonfunctional	The system shall prevent employee personally identifiable information from being exposed to therapists through booking, counseling, and wellness interfaces.	High	Pass: Therapist interfaces display only the employee pseudo-ID and permitted session information. Fail: Corporate email, employee ID, or other employee PII is displayed.	Confidentiality is essential to an anonymous counseling platform.

3) Use-Case Flow Specification

UC-04 — Book Counseling Session

Primary Actor: Corporate Employee

Preconditions

1. Employee has an active account and is authenticated.
2. Employee has an anonymous pseudo-ID.
3. At least one therapist has an available appointment slot.

Main Success Scenario

1. Employee selects **Book Counseling Session**.
2. System displays available therapists and appointment slots.
3. Employee selects a therapist and preferred slot.
4. System verifies slot availability.
5. System associates the booking with the employee's anonymous pseudo-ID.
6. System creates the counseling appointment.
7. System updates the therapist's availability.
8. System sends booking confirmation to the employee.
9. System displays the confirmed appointment details.

Alternate Flow — Slot Unavailable

4a. If the selected slot is unavailable, the system informs the employee and displays alternative available slots.

4b. Employee selects another slot.

4c. System resumes the main flow from Step 4.

Postconditions

- Appointment is successfully stored.
- Selected slot is marked unavailable.
- Employee receives confirmation.
- Therapist can view the appointment using the pseudo-ID.
- Employee's corporate identity remains hidden from the therapist.
